

Provet for Veterinary Groups

# One Practice Management Platform for Every Clinic in Your Group

[Start your free pilot →](#)

Your group has grown fast, but many of your clinics are still running on separate systems. Provet lets you standardize care, track performance across the portfolio, connect labs and inventory, and replace scattered point solutions with one platform.

## Veterinary groups today are challenged with

- Running multiple PIMS across their group, each with their own workflows.
- Current platforms don't work well across all practice types — GP, specialty and referral, and emergency.
- Piecing together reports clinic-by-clinic, with no holistic view of performance.

*“As a large organization using the same practice management system, we can track quality assurance at a company level, and that's incredibly beneficial.”*

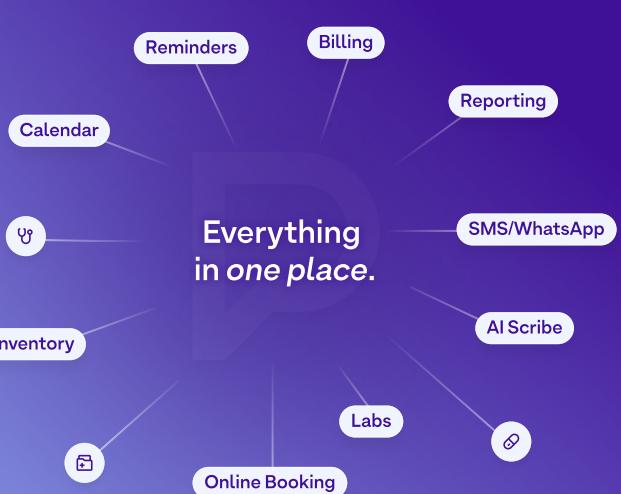

## Trusted by leading veterinary groups

## Life Without Provet – Fragmented

## Life With Provet – One Workspace

## How Provet helps standardize care across your clinics

### Save Hours Every Day

Give your clinics a system that adapts to the way they provide care, uses AI to automate admin, removes tab switching, and gives every practice hours back, every day.

### One Workspace

Manage a single PIMS across your group so your clinical teams can work from one workspace with bookings, reminders, AI scribe, EMR, two-way client conversations, inventory, and reporting, without ever switching tabs.

### Consolidate Reporting

See how your whole group is performing with 34 pre-built and customizable reports that give you a holistic view across every clinic, Veterinarian, and inventory item.

### Open Platform

Connect Provet to the tools you already use with an open API and 150+ pre-built integrations, so your ecosystem works together instead of in silos.

### Proven Implementation

Provet has the only global team of former veterinary professionals who've launched thousands of clinics across 10+ veterinary groups like yours.

## Our offer

Pilot Provet in up to 5 clinics with 3 months free, implementation included, and no contract required.
